**Doctor@Home** the *New Frontier of Borderless Healthcare* is a medical service incorporating the use of modern technology for health monitoring providing a simple, anytime, anywhere 24/7 on-demand access to quality healthcare.

It helps resolve both your routine or non-fatal emergency medical issues, on-demand 24/7, via phone or using state of the art online video consultations from wherever you happen to be.

#### Importance of Doctor@Home

With today's rising cost and inflation and where time is money. The cost associated with a doctor's visit includes not just the doctors consultation fees but indirect cost like transport, long waiting time, time off work and unnecessary worry for other family members.

**Doctor@Home** is designed to meet the needs of the both individuals and families to provide *immediate cost effective top quality medical management* to **Seniors, Elderly, Working Adults** and **Juniors** alike by offering members 24/7 on demand user pay consultation services via phone or video. Hence, reducing unnecessary visits to the hospital or clinic, thus saving time and lowering overall long term healthcare cost to the individual in the community.

#### Uses and Benefits of Doctor@Home

Whether it may be

- a) routine medical checkup for diabetes, hypertension,cholesterol, stroke, wound care , etc
- b) a non-fatal emergency situation - like fever, migraine headache, urinary tract infection, muscle/back strains, upper respiratory infections, runny or stuffy nose, sore throat, allergies etc
- c) prescription medication
- d) a referral to a specialist or a referral for blood test or investigations - X-rays, MRI, CT Scans, Ultrasound Scans etc
- e) dental emergencies
- f) pediatric monitoring for fever and emergency advice
- g) before and after travelling advise- vaccinations, preventive measures, medications etc
